Gleb Rosev

HANDS-ON TECHNOLOGY LEADER | ARCHITECTURE, RELIABILITY & AI-NATIVE SYSTEMS

Tbilisi, Georgia | +995 591 90 81 80 | rossevgleb@gmail.com | linkedin.com/in/rossev

EXECUTIVE PROFILE

Hands-on technology leader with 8+ years of commercial experience building production software, distributed systems, AI platforms, and multi-tenant B2B products. Combines software architecture and engineering management with hands-on work across backend services, cloud infrastructure, observability, testing, and production operations. Led planning, hiring, architecture, and cross-functional delivery while remaining active in the codebase. Led teams of up to 12 people and translated business priorities into product direction, technical architecture, and production delivery. Experienced in raising engineering quality, improving reliability, introducing pragmatic delivery standards, and resolving complex production issues across healthcare, fintech, crypto, and enterprise SaaS environments.

SELECTED IMPACT

ENGINEERING LEADERSHIP	TECHNICAL + PRODUCT OWNERSHIP
Led engineering and cross-functional teams ranging from approximately 5 to 12 people while remaining hands-on.	Translated CEO business priorities into product direction, technical architecture, and executable delivery plans.
PRODUCTION DELIVERY	**OBSERVABILITY + RELIABILITY**
Introduced feature flags and managed trunk-based delivery across multiple environments, canary releases, and interdependent services.	Drove Grafana alerting and metric-based production oversight with DevOps support.

PROFESSIONAL EXPERIENCE

Staff AI Engineer - Harness & Voice Systems | Sully.ai

Sep 2025 - Present

Remote | US and MENA

Healthcare AI company building AI employees for clinical and administrative workflows.

- Build and harden production-grade multilingual AI systems spanning real-time voice pipelines, telephony, backend services, UI, infrastructure, and operational tooling.
- Develop evaluation, observability, and runtime-diagnostic workflows that make system behavior traceable and production failures faster to isolate.
- Drive incident investigation, stress testing, deployment hardening, and reliability improvements for enterprise healthcare launches.
- Support and mentor a small AI-focused engineering team through technical guidance, debugging, and production decision-making.
- Translate Product, QA, Infrastructure, Customer Success, and customer requirements into production-ready technical solutions.
- Contribute to a platform publicly trusted by 400+ healthcare organizations and platforms representing 100,000+ providers.

Engineering Manager / Senior Full-Stack Developer | Kingpin

Sep 2024 - Aug 2025

Dubai, United Arab Emirates

AI-powered multi-tenant B2B SaaS platform for wholesale and distribution.

- Led a cross-functional team of up to 12 people across technical execution and product delivery while remaining hands-on in the codebase.
- Translated CEO business priorities into product direction, technical architecture, delivery plans, and working software.
- Delivered multi-tenant catalog and transactional order workflows with external ERP/CRM integrations.
- Introduced feature flags and helped establish trunk-based delivery from main across multiple environments, canary releases, and coordinated service rollouts.
- Drove Grafana alerting and metric-based production oversight in collaboration with DevOps.
- Built an LLM-powered feedback pipeline that converted Sales and Customer Success input into structured product insights, reducing analysis time by 80%.

Lead React Native Developer | Kernelics

Feb 2023 - Sep 2024

London Area, United Kingdom

Product engineering across healthcare, fintech, AI, food technology, e-commerce, and crypto.

- Led a team of approximately five people across web and mobile product delivery.
- Worked in monorepo-based delivery environments, coordinating application changes, build artifacts, and deployment cycles.
- Improved production stability through infrastructure, delivery, and reliability work.
- Integrated secure cryptographic modules into an application with 100,000+ downloads.

EARLIER ENGINEERING LEADERSHIP

Frontend Team Lead | BattlePro
Feb 2022 - Feb 2023

New York, United States

Sports tournament management platform.

- Led a team of five people and owned frontend architecture, delivery processes, budget, and hiring.
- Increased sprint throughput from 25 to 55 story points and achieved 220-250 ms TTFB with 1.7-second Time to Interactive on key product surfaces.

React Native Team Manager | ITechArt Group
Jan 2020 - Feb 2022

New Jersey, United States

International software engineering services company.

- Managed a team of three developers and coordinated delivery across mobile, web, and backend workstreams.
- Built a mobile application and website from scratch and delivered both to production against an event-driven launch deadline.
- Developed a CMS-driven component system and implemented complex virtual networking and infrastructure solutions.

Full-Stack JavaScript Developer | ITechArt Group
Jan 2018 - Feb 2020

New Jersey, United States

Full-stack product development across application, backend, and infrastructure layers.

- Independently built a web application, backend, and infrastructure for a product with complex virtual networking requirements.
- Selected and implemented an architecture used by a product that later attracted more than $10M in investment.
- Created reporting and time-tracking automation that reduced employee effort by 15-25% and improved data accuracy.

Frontend Mentor & Tutor | TeachMeSkills
Jun 2020 - Nov 2021

Remote

Technical education and mentorship.

- Delivered 150+ React and advanced JavaScript lectures and designed curriculum later used by 1,500+ students per year.

CORE CAPABILITIES

Architecture & Platforms: Distributed systems, multi-tenant SaaS, backend services, external integrations, PostgreSQL, Redis, Kubernetes, Docker, AWS, Azure, GCP

Reliability & Quality: Observability, incident response, stress testing, production diagnostics, automated testing, CI/CD, Grafana, Loki, Mimir

AI Systems: OpenAI, Anthropic Claude, Gemini, LiveKit, Twilio, Speechmatics, Vertex AI, LangChain, CrewAI, MCP, RAG, agent evaluation

Engineering: TypeScript, JavaScript, Node.js, NestJS, React, React Native, Next.js, PostgreSQL, MySQL, MongoDB, Playwright, Cypress, Jest

Leadership: Engineering management, hiring, architecture, mentoring, product strategy, cross-functional delivery, Agile/Scrum

EDUCATION & LANGUAGES

Belarusian State University - Medicine, 2015-2019 | **English:** C1 | **Russian:** Native
